Care Plus Incubator Platform
When Life is Most Fragile
GE’s Care Plus® incubator platform brings you a unique microenvironment that eases the newborn and helps you provide exquisite care. Each flexible, modular system is designed to make caregiving easier in a busy environment with varying procedures.

Comfy Cozy

Active double-wall construction minimizes radiant heat loss and fogging and maintains a stable temperature - even with the door open for procedures.

Humidity systems provide variable humidity control to protect the newborn’s skin.

Nurturing Care

Soft progressive alarms alert you without disturbing baby. Silenceable alarms beep softly as an initial warning, and change to a two-tone alarm after 30 seconds.

Accessibility and visibility. Alarm readouts, control panels and reservoir are easily viewed. Caregiver and family have easy access to baby from all four sides through six portholes. Clear acrylic hood allows distortion-free viewing.
Easy to clean and reassemble. The entire unit comes apart in minutes without tools. Parts are keyed so they can only be reassembled correctly.

Building On Your Investment

Using a Dovetail Rail and shelf system as a framework, the Care Plus incubators can be configured to meet the unique demands of your care area. And are adaptable, allowing for upgrades for the future. A wide variety of options improve organization, save space and allow you to spend more time caring for newborn patients.

Standard Care Plus Configuration Includes
• Dovetail Rail system.
• Standard Humidifier for variable control of humidity.
• Care Plus 3000: Three-position tilt for easy, precise adjustment to 0º, 3º and 6º at either end of the bed.
• Care Plus 4000: Continuous Tilt allows smooth, unlimited adjustment from 0º to 12º.

Care Plus Options:
• Servo Humidifier controls humidity from 40-85% at any incubator temperature.
• In-bed scale measures weight without moving the baby.
• Elevating base with foot-activated switch.
• Stationary base for mobility and storage at an economical price.
• In-frame drawer storage units
• Mounting accessories include a variety of posts and brackets for mounting ventilators, infusion pumps and IV lines.

GE has a passion for providing patients with the best in perinatal care. Our Care Plus incubators are designed with both the caregiver and the newborn in mind.
For more than 100 years, scientists and industry leaders have relied on General Electric for technology, services and productivity solutions. So no matter what challenges your healthcare system faces – you can always count on GE to help deliver the highest quality services and support.
